

St John's Church, Beeston, Nottingham

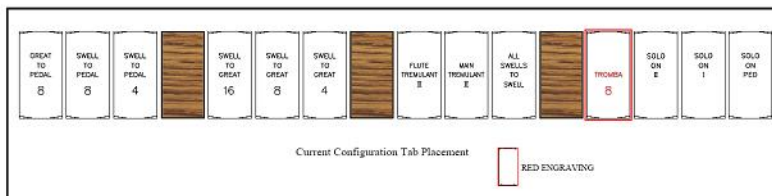

The Rodgers organ for St John's has been designed by Mark Underwood in collaboration with Paul Hale, Organ Advisor for the Diocese of Southwell. It will be installed in February 2008 as part of a major re-ordering project.

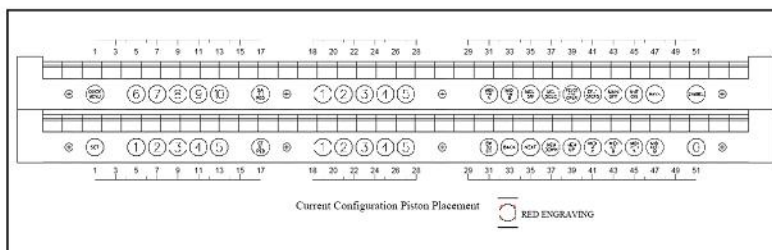

It will be a Custom 838 console with 2 manuals & pedals and 39 speaking stops. The console will be on a moveable plinth in the nave, and the multi-channel audio system located on the west wall of the church. There will be a separate speaker division for the solo Tromba stop.
