

# North Church, Perth, Scotland

2 Manuals & Pedals 34 Stops

Installed in December 2006, the Rodgers Trillium Masterpiece 808 was custom designed for North Church to replace their worn out pipe organ and installed as part of a large interior re-ordering project. The organ includes lighted stop tabs and premium wooden keyboards, and a colour finish carefully selected to match the church's existing woodwork.

A multi-channel tri-amplified speaker system is located behind the pipe-fronts from the old organ case, and a Rodgers MR-200 MIDI data recorder was also included so the organists can record hymns for periods of absence.

The Rodgers TM808 has enhanced the lively musical worship at North Church. It can be heard every Sunday alongside a vibrant musical team, including singers, guitars, keyboards, percussion, and a brand new Roland V-Drum kit!
